01 — PROFILE

Quality engineer with over 5 years of experience in industrial quality in high-precision environments (Chip-on-Board micro-assembly, plastic injection overmoulding, milling, dispensing) certified to ISO 9001 and ISO 13485. Manages customer and supplier quality, secures new product launches (**13 new products industrialised**; 4 of the 6 high-volume products with zero customer complaints in 4 years) and improves processes with data: yield raised from **89 % to 98 %** through automated SPC, and milling scrap brought down from **17.3 % to 0 %**. Skilled in quality tools (APQP, FMEA, SPC, MSA, capability, 8D) and metrology (Zeiss O-Inspect CMM, Keyence IM), and driver of the digitalisation of quality workflows.

02 — PROFESSIONAL EXPERIENCE

Quality Engineer · Customer and supplier quality

Oct. 2022 – present

ml&s Suisse SA · precision electronics manufacturer (ISO 9001 / ISO 13485) — Delémont, Switzerland

- **New product introduction: 13 new products industrialised** up to series production following APQP: customer requirements tracked at each phase, FMEA, IQ/OQ/PQ protocols, MSA and capability studies, PPAP or FAI packages depending on the customer; **4 of the 6 high-volume products with zero customer complaints in 4 years**.
- **Customer quality:** quality contact for customers, complaint handling and action plan follow-up, preparation and hosting of customer audits; set up **PPM** tracking and defect Pareto for my customer scope.
- **Supplier quality:** management of **40 suppliers** (PCBs, electronic components, mechanical and electromechanical parts, process consumables: solder paste, underfill, glob-top), together with purchasing; **–30 % supplier complaints** in 3 years through product audits and quarterly and half-yearly performance reviews.
- **Supplier selection and approval:** set up the selection and approval procedure for new suppliers; 2 to 3 supplier audits per year; PPAP approval.
- **Supplier change:** after recurring complaints and late deliveries, qualified a new ceramic PCB supplier, going from **6 complaints in 1 year to 0 in 3 years**.
- **Incoming inspection:** operational management of incoming inspection and approval of purchased components.
- **Process improvement:** yield of a highly complex Chip-on-Board product raised from **89 % to 98 %** through automated SPC of critical parameters (Excel tool in use for 2 years, evolved into a dedicated SPC application with capability tracking); milling scrap rate brought down from **17.3 % to 0 % in 7 months**; reduced scrap in glue and epoxy dispensing.
- **Problem solving:** rolled out the **QRQC** approach in 2025; coordination of internal, supplier and customer non-conformities; led root cause analyses and corrective actions (8D, 5 whys, Ishikawa 5M, FMEA), including physical analysis by X-ray, optical microscopy and cross-sectioning.
- **Design of experiments:** go-to person for design of experiments when setting machine parameters during prototyping.
- **Cost of poor quality:** calculated from in-house tracking tools covering complaints, OQC and scrap; weekly review led with workshop managers.
- **Digitalisation:** customer and supplier complaint processing time **cut by 50 %** through automated KPI reporting and workflows (Power Automate, Power BI, Power Apps).
- **Quality system:** ISO 9001 and ISO 13485 internal auditor; harmonised quality and purchasing processes; trained teams on internal quality standards; REACH, RoHS and CMRT compliance lead.

Quality and HSE Engineer · work-study

Feb. 2021 – Oct. 2022

Cordon CMS · electronics manufacturing services (EMS) — Ribeauvillé, France

- Led a project combining production data and inspection resources to deploy a preventive quality strategy.
- Internal auditor; prepared customer audits and ISO 9001 / ISO 14001 certification audits; maintained ISO 9001, 14001 and 45001 documentation.
- Ran safety walks, QHSE training and the health and safety committee (CSSCT); contributed to the group's CSR policy.

03 — PERSONAL PROJECT

Qyklo · quality management system software

2026 · qyklo.com

- **Goal:** make ISO 9001 and ISO 13485 compliance simpler day to day for the whole company, by bringing together in one tool what is often scattered across Excel files and binders.
- **Modules:** quality policy and KPIs, process and management reviews, audits, customer complaints and 8D, supplier management, deviations and production quality alerts.
- **Approach:** personal project developed in my free time, with no connection to my employer; functional design from my shop-floor experience, AI-assisted development in Python, an interface designed for non-quality specialists. Applications and demo at ykaabar.github.io.

04 — SKILLS

Quality tools	QRQC, 8D, 5 whys, Ishikawa (5M), FMEA, SPC, MSA, capability (Cp/Cpk), design of experiments (DOE), cost of poor quality, PPM, Pareto, APQP, PPAP, FAI, IQ/OQ/PQ, failure analysis (X-ray, microscopy, cross-sectioning)
Standards and regulations	ISO 9001, ISO 13485, ISO 14001, ISO 45001, IPC-A-610 (Certified IPC Specialist), REACH, RoHS, CMRT; internal auditor
Metrology	Programming and operation of the Zeiss O-Inspect CMM and Keyence IM
ERP, data and digital	SAP, Power BI, Power Automate, Power Apps, MS Office, Python (beginner), SQL (beginner)

05 — EDUCATION

Mastère Spécialisé® (Advanced Master's) in QHSE Management · CESI, Strasbourg — 2021 – 2022

Master's in Safety and Environment · UHA, Mulhouse — 2019 – 2021

Bachelor's in Environment, Health and Safety · UHA — 2018 – 2019

Technical degree (DUT) in Chemistry · IUT Illkirch — 2016 – 2018

06 — LANGUAGES

French	native
English	fluent, professional (TOEIC 985/990)
Moroccan Arabic	fluent
German	basic

07 — INTERESTS

Volunteer with a charity · CrossFit · Rugby
